COMPETITIVE RESEARCH

The main competitors of BiteTribe are food delivery platforms like Zomato/ Swiggy and Search Engines like Google.

FOOD DELIVERY APPS

Strengths

- Wide Coverage of restaurants and street food vendors.
- Strong community of users.
- Promotions and Discounts
- Curated list of restaurants and type of food.

Weaknesses

- Limited focus on street food
- Inconsistent vendor information.
- Street food vendors are often overshadowed by established restaurants.
- Lack of real time updates.

SEARCH ENGINES

Strengths

- Global Reach
- User generated content
- Real time navigation
- Search Flexibility

Weaknesses

- Unstructured Information
- Inaccuracy in details
- Minimal community engagement

[Study of International Equivalents: Insights from Successful Street Food Models](#)

Objective: Create a thriving community of street food lovers who actively discover and review street food vendors.

INSIGHTS FROM USER INTERVIEWS

Interviewer 1: I love street food but I usually avoid eating due to hygiene issues.

Interviewer 2: Whenever I want some good chinese, I just can't find it.

Interviewer 3: I love a particular cart but it doesn't stay at one place.

Interviewer 4: At main markets, there are too many carts together. I just can't decide where to eat from.

VENDOR'S PAIN POINTS

1. Inconsistent Customer Flow
2. Lack of marketing or branding knowledge
3. Limited digital presence
4. Too much competition
5. Inventory Management
6. Transportation and Logistics
7. Lack of access to high quality ingredients and hygiene products.

PRODUCT & BUSINESS OUTCOMES

TARGET USER SEGMENTS

Local food lovers

Age: 18-40

Behaviour: Regularly dine out, active on social media, value unique and authentic food experiences.

Tourists and Travelers

Age: 22-55

Behaviour: Research destinations before visiting, rely on online reviews and guides, interested in local experiences.

USER PERSONAS AND USER SURVEY ANALYSIS

WHAT IS THE ACTUAL PROBLEM AND WHY TO SOLVE IT

A [survey](#) was conducted to understand the demographics, behaviour, needs, wants and pain points of Street Food consumers.

Rohan Verma, 28

Marketing Executive
Pune, India

Goals:

- Find the best street food options near his workplace or home.
- Discover hidden gems and share his food experiences with friends and on social media.

Pain Points:

- Difficulty in finding reliable information about street food vendors.
- Concern about hygiene and food safety.
- Limited time to explore different street food options.

Background:

Rahul is a tech-savvy individual who works in a fast-paced environment. He enjoys exploring new places and foods during weekends or after work. With a busy schedule, he relies on mobile apps for quick and reliable information.

Neha Singh, 32

Graphic Designer
Delhi (Traveling to Pune)

Goals:

- Experience authentic local street food in different cities.
- Get recommendations for safe and hygienic must-try street food spots.

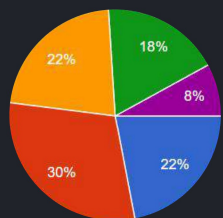

Pain Points:

- Uncertainty about where to find the best local street food.
- Difficulty in navigating unfamiliar cities to find street vendors.
- Concerns about hygiene, especially in unfamiliar locations.

Background:

Neha loves to travel within India and explore local cultures and cuisines. She often visits different cities for both work and leisure. As a foodie, she's always on the lookout for authentic local street food when visiting a new place.

Frequency of street food consumption among users

- Daily
- 2-3 times a week
- Once a week
- Occasionally (once a month)
- Rarely

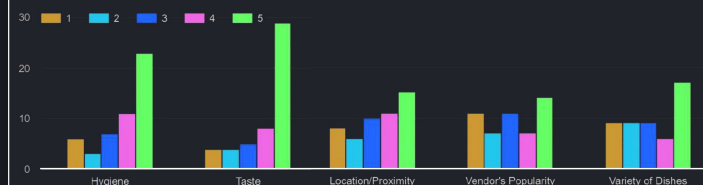

Detailed Survey Analysis

What motivates users to eat street food?

How important are the following factors when choosing a street food vendor?

(here 1 is not important and 5 is very important)

% of users willing to post a review on app

74%

WHAT IS THE ACTUAL PROBLEM AND WHY TO SOLVE IT NOW

IDEATING POSSIBLE SOLUTIONS WIREFRAMING

IDENTIFYING THE TRUE PROBLEM

The core issue is the disconnection between consumers and street food vendors. Consumers struggle to discover authentic, quality street food options due to a lack of organized platforms dedicated to street food. On the other hand, vendors face significant challenges in gaining visibility and attracting a consistent customer base, relying heavily on foot traffic and word-of-mouth.

VALIDATING THE PROBLEM

We conducted primary research which gives us various insights to validate this problem:

- **74%** people consumer street food at least once a week
- **54%** find it difficult to locate good street food options near them with **68%** people concerned about hygiene.
- **60%** people considers word of mouth to visit a street food vendor
- **50%** people would prefer to go to vendors with hygiene rating or certification

WHAT IS THE VALUE GENERATED BY SOLVING THIS PROBLEM?

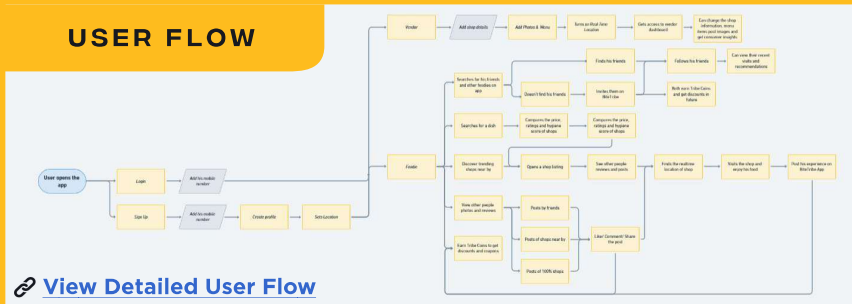

For consumers solving this problem means gaining easy access to a curated list of street food vendors, saving time and ensuring a satisfying food experience. It also enriches their culinary journey by introducing them to hidden gems and diverse food cultures.

For Vendors the value lies in increased exposure, leading to higher foot traffic and sales. They can establish a loyal customer base and possibly expand their business. The app also offers an opportunity to engage with customers directly, collect feedback, and improve their offerings.

IMPORTANCE OF SOLVING THE PROBLEM NOW

The demand for unique and authentic food experiences is growing, and consumers are increasingly turning to digital solutions to discover them. For vendors, the shift towards online discovery, especially post-pandemic, means that without a platform like BiteTribe, they risk losing potential customers and falling behind more digitally-savvy competitors. Addressing this now ensures that both consumers and vendors can thrive in this evolving food ecosystem.

USER FLOW

HOW TO TARGET OUR POTENTIAL USERS?

1. Trustworthy Hygiene Ratings
2. Real-Time Vendor Tracking
3. Exclusive Local Deals

PROPOSED SOLUTIONS

TRIBE COMMUNITY

A social platform within the app where users can share their street food experiences, post reviews, photos, and engage with other food lovers.

HYGIENE CERTIFICATION/ SCORE

A system that evaluates and displays hygiene scores for street food vendors based on inspections or certifications. Vendors with high scores get promoted within the app.

REAL TIME LOCATION

Provides users with real-time tracking of vendor locations, helping them find street food options nearby.

SOLUTION PRIORITISATION

PARAMETERS	REACH	IMPACT	CONFIDENCE	EFFORT	SCORE
TRIBE COMMUNITY	10	9	9	8	101
HYGIENE SCORE	8	10	9	10	72
REAL TIME LOCATION	9	8	7	6	100

MVP

Features with score above 100 are being chosen for MVP and rest of them will be picked once MVP is made.

Based on the RICE scores, solutions with most priority are:

1. Tribe Community
2. Real Time Locations

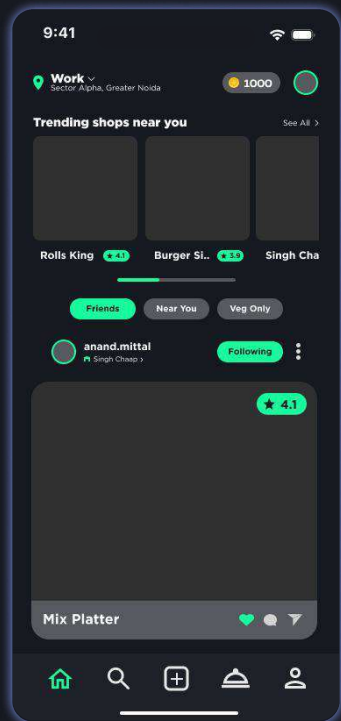

FRAMEWORK USED (RICE)

$$\text{Rice Score} = \frac{\text{Reach} \times \text{Impact} \times \text{Confidence}}{\text{Effort}}$$

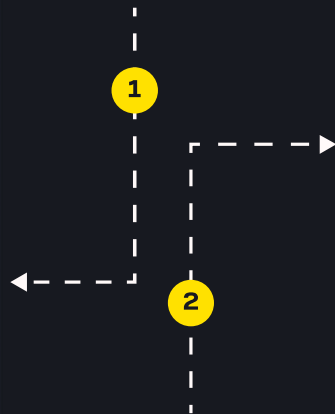

[Detailed Calculations and Explanations](#)

BENEFITS OF CHOSEN SOLUTIONS

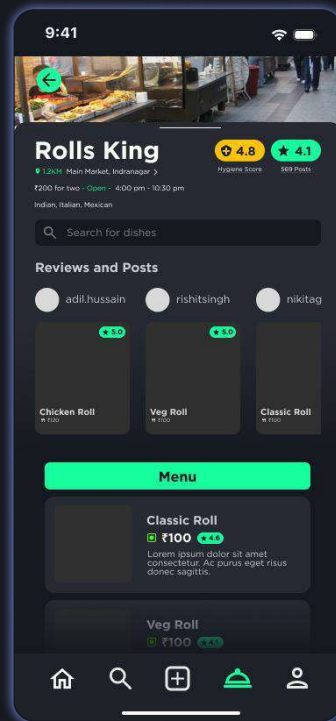

- Encourages user engagement and retention.
 - Builds a community of street food enthusiasts.
 - Drives organic growth through word-of-mouth and social sharing.
- Enhances user experience by making it easy to locate vendors.
 - Allows vendors to attract more customers by being visible in real-time.

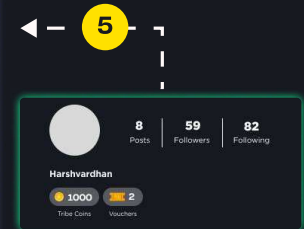

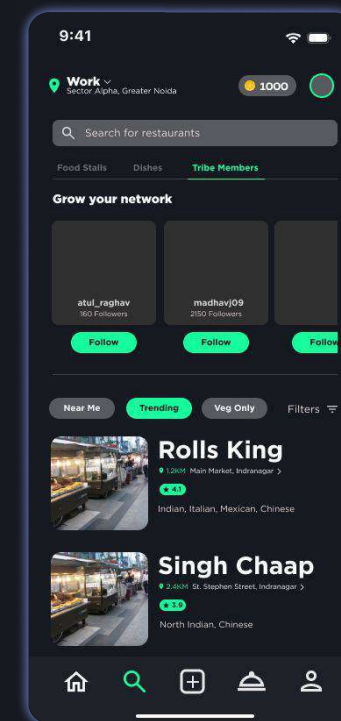

Users see posts of their friends / foodies near them and can engage with them

On opening shop page, users can see the reviews and ratings of users who have visited the shop physically and image or video of the food they had.

Users can search for Tribe Members in search section, follow them, see their profile and see posts they have posted.

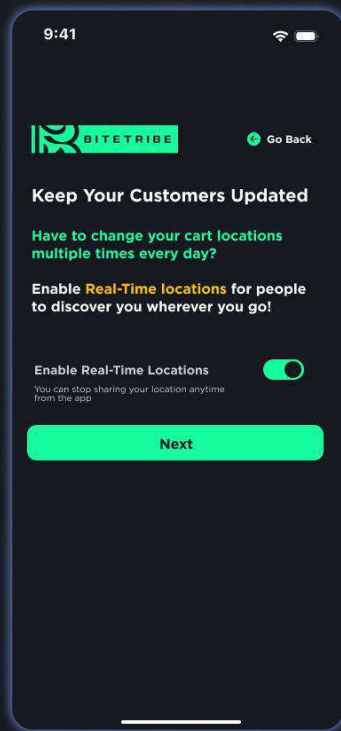

Profile section shows the number of posts posted, followers and following of user / foodies. User gets to see their Tribe Coins and earned Vouchers. Users could also edit their posts and reviews and create a list of their favourite shops.

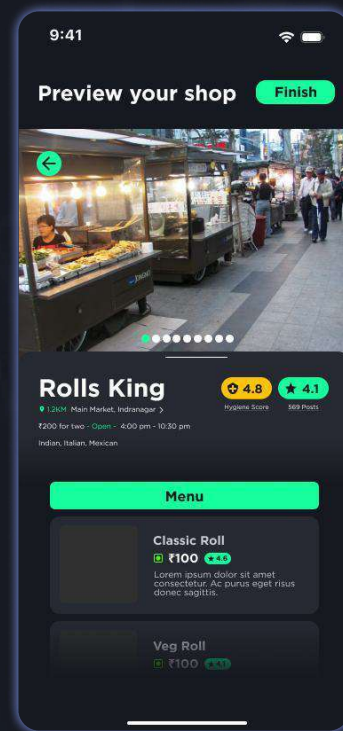

Users can post their experience they had at a shop for their friends/ foodies and subsequently earn **Tribe Coins**.

Tribe Coins

Tribe coins can be used to get discounts and brand vouchers and can be earned by posting, sharing and inviting friends!

Vendors gets an option to share their real time location by which users would be able to locate them on the go. They can turn the option off when they close their shop.

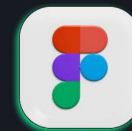

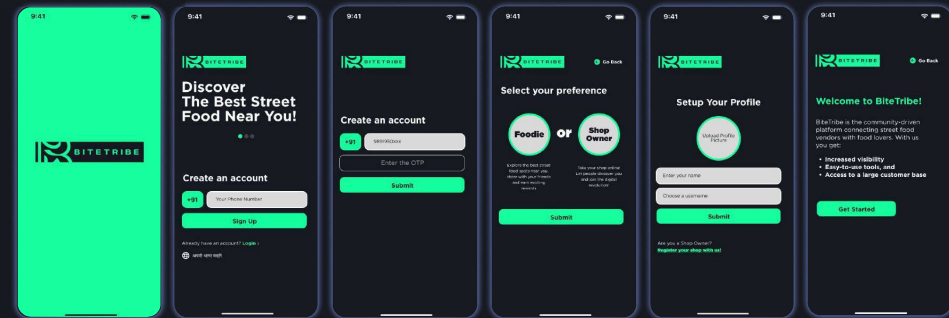

Users can access the shop's real time location from shop's landing page. The option would take them to their default navigation app from where they can easily reach the vendor!

NSM

Total Active Users Engaged with Street Food Vendors Weekly

This reflects the key value provided by the app: connecting users with street food vendors.

1

Awareness Metrics

- % Users Referring other People
- Total Engagements on Social Media Posts /Total Followers

2

Adoption Metric

- # New Users signing up per month
- % Users posting atleast once a week

3

Engagement Metric

- Average Session Duration
- # Images or Videos Posted Daily / DAU

4

Revenue Metric

- Total Ad Revenue / # Impressions
- Total Revenue Generated / # Users

5

Retention Metrics

- Churn Rate (Number of Users Lost in a month / Total Users at Start of Month)
- User Retention Rate
- % Users posting more than once a week
- % Users redeeming Tribe Coins

RISKS INVOLVED AND MITIGATIONS**1. Low Vendor Adoption**

- **Risk:** Vendors may resist due to low digital literacy.
- **Mitigation:** Simplify onboarding, offer training, and provide incentives like free promotions.

2. User Acquisition & Retention

- **Risk:** Difficulty attracting and keeping users.
- **Mitigation:** Use targeted marketing, engage users through Tribe Community, and introduce referral programs.

3. Data Accuracy

- **Risk:** Inaccurate real-time location data.
- **Mitigation:** Allow vendors to update their status, use user feedback, and crowdsourcing to ensure accuracy.

4. Hygiene Concerns

- **Risk:** Poor hygiene standards could hurt reputation.
- **Mitigation:** Implement hygiene certifications, regular audits, and transparency by displaying scores on vendor profiles.

5. Monetization Challenges

- **Risk:** Users or vendors may resist paying for premium features.
- **Mitigation:** Offer a freemium model with clear value in paid tiers, provide promotional discounts, and show ROI for vendors through increased visibility and sales.

BITETRIBES

REVENUE STREAMS

- **Advertisements:** Steady growth with a focus on personalized and premium ads.
- **Street Food Festivals:** Significant revenue potential as the brand expands into events.
- **Monthly Subscriptions:** Recurring revenue with potential for high growth as more users and vendors see value in premium features.
- **Affiliate Marketing:** A supplementary revenue stream with potential for high returns through strategic partnerships.
