Company Overview

Industry: Food Tech

Established: 2014

HQ: Bangalore

No. of Employees: >5000

2 lakh + delivery fleet

Problem Statement

Since the cart abandonment rate is > transaction rate.
Converting visitors, new & dormant users into transacting users.

01

India's leading on-demand food delivery platform with a tech-first approach to logistics

02

Present in **500** cities across India, partnering with thousands of restaurants to offer dine-in options.

03

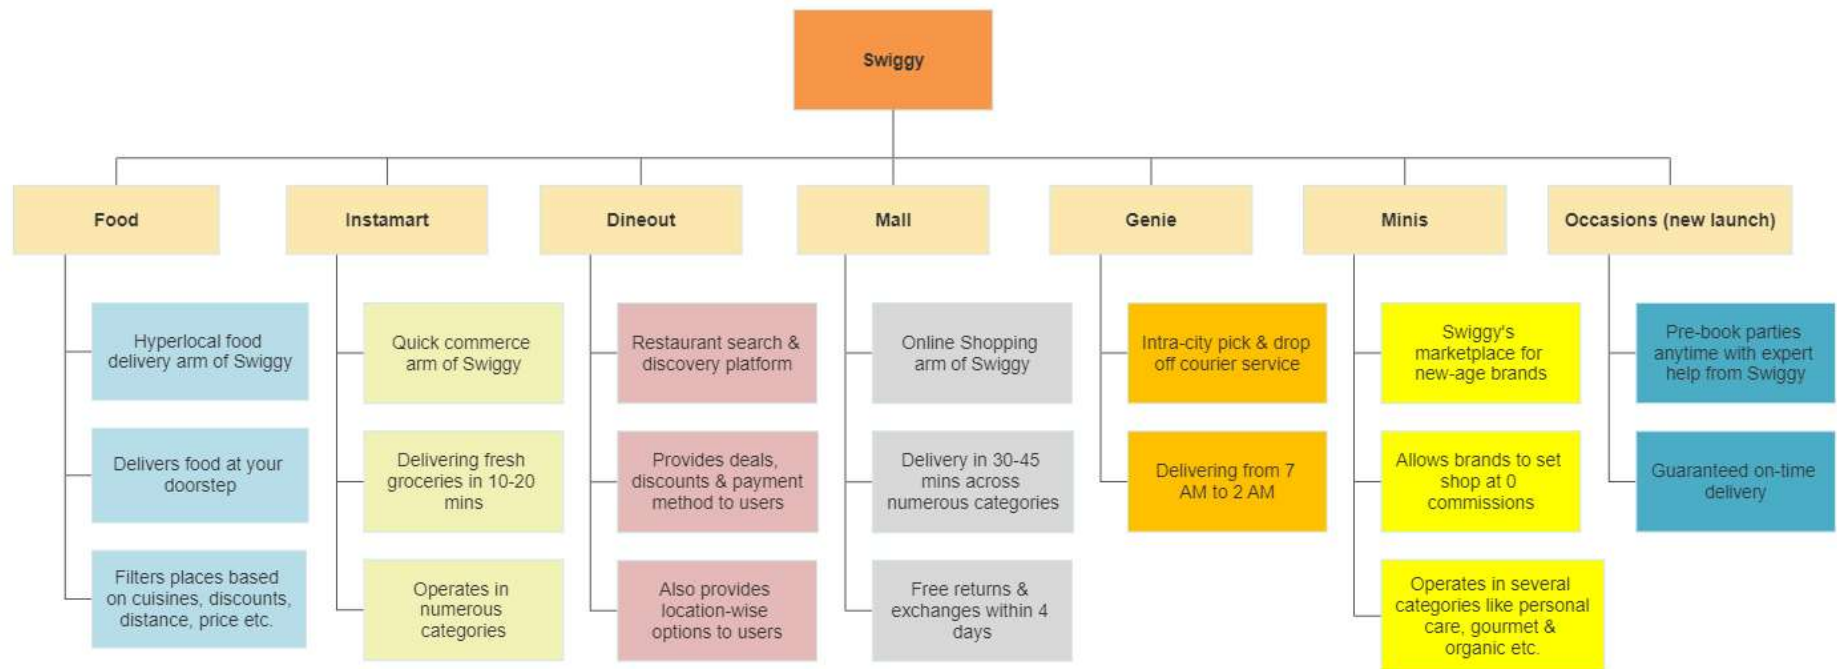

Also operate in restaurant discovery, marketplace, intra-city courier & grocery delivery

Offerings of Swiggy

Instamart:

- Operates in categories like Dairy, Pulses & Atta , Biscuits & Cakes, Instant & Frozen Food, Cleaning Essentials, Pharma & Hygiene to name a few.
- Also provides separate brand & product pages

Dineout:

- Can filter restaurants by cuisines, popularity, offers, type, location etc.
- Category-based selection also possible: nightlife, rooftop, pubs, buffet, newly added etc.

Competitive Analysis

Competes in:
Online Groceries
with
Swiggy Instamart

Features

A Tata owned company

Offers multiple solutions:

- Big Basket: Online Grocery
- BB Now: Quick Commerce (direct competitor)
- BB Daily: A daily grocery service offering limited assortment of mostly dairy, fruits & vegetables.

Delivers in 30-45 minutes with a cashback guarantee

Competes in:
Online Groceries
with
Swiggy Instamart

Features

A Zomato company, completely owned by Zomato

Started during the Covid lockdown in 2020.

Part of the quick commerce segment, delivers fresh groceries & printing services in 10 minutes.

No subscription plan available at the moment.

Competitive Analysis

Competes in:

**Food Delivery & Dining out
with
Swiggy & Swiggy Dineout**

Features

Founded in 2008 as a restaurant search & discovery platform

Expanded into dining, groceries (Blinkit) & inter city food delivery services.

Provides an expansive list of restaurants to the users, along with daily deals of restaurants.

Rewards users having a Zomato Gold Subscription service in terms of delivery, dining & inter city food delivery.

Competes in:

**Online Groceries
with
Swiggy Instamart**

Features

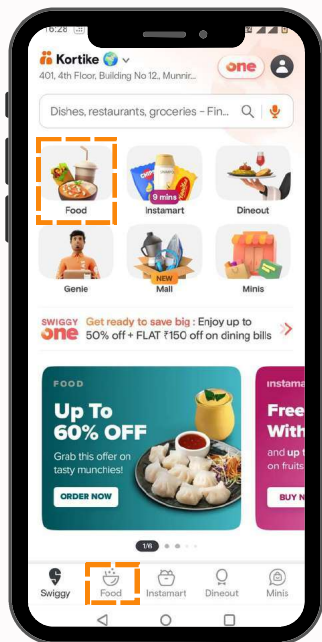

Part of the quick commerce segment.

Delivers groceries in 15 minutes.

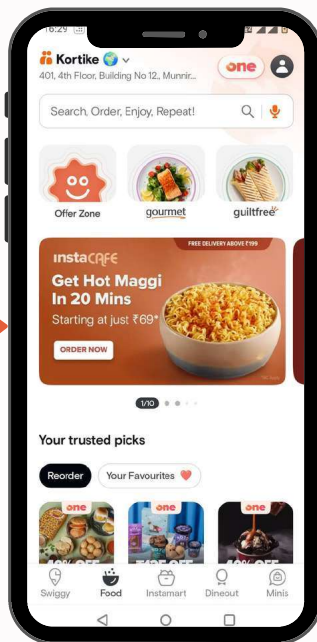

Operates in numerous categories while the current presence is limited across India.

Customer Journey - Order Food

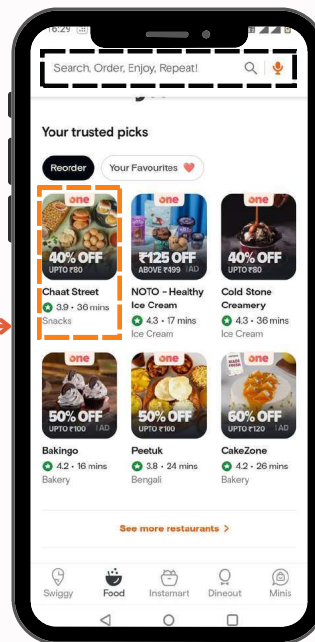

To order food from Swiggy, the customer has to follow the below user journey:

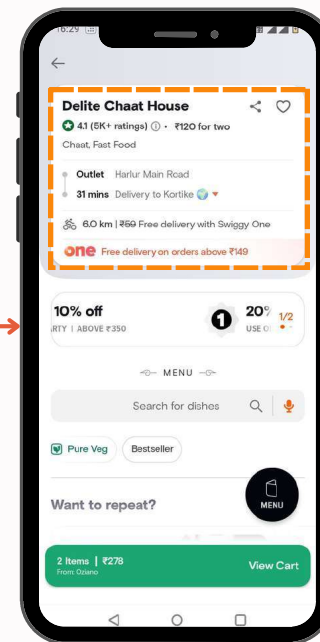

Open the Swiggy app. Click on 'Food' at the top/bottom.

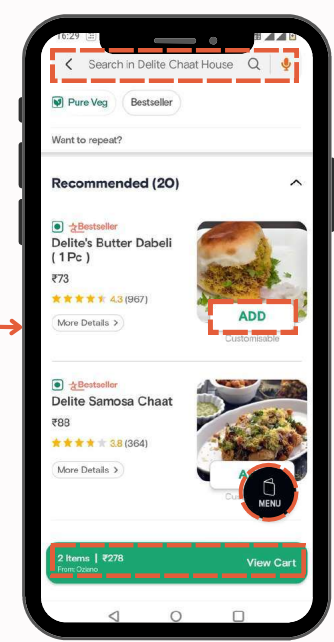

This is the 'Food' option of Swiggy.

Here, you can search & order, or select a place from the list & order.

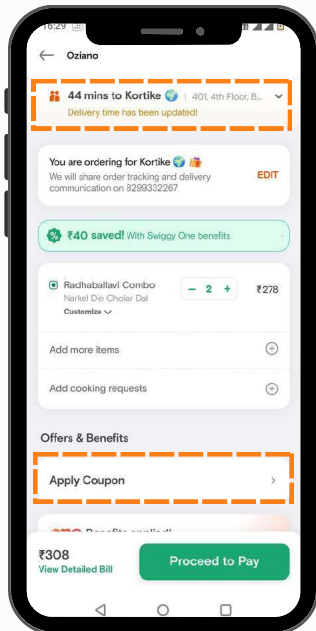

The **restaurant** page, where all the details of the outlet & the items will be listed.

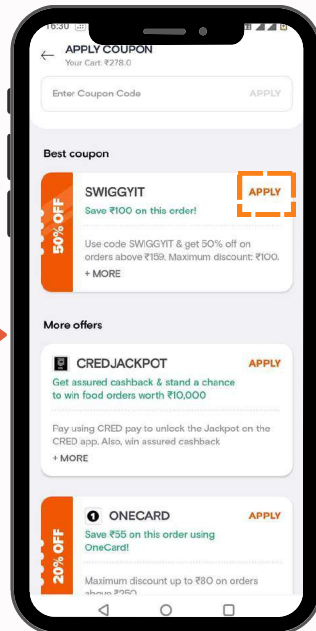

Here also you can either search an item or select from the list by clicking on **Menu** & **add to cart**. Then **View Cart**

Customer Journey - Order Food

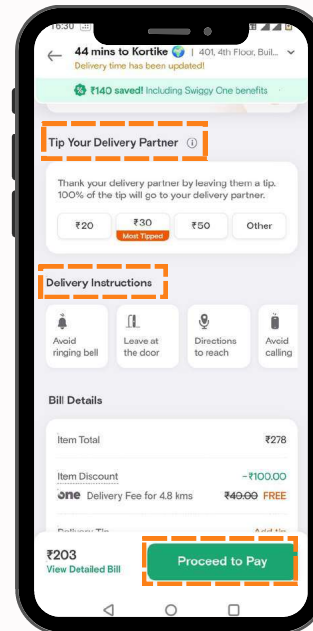

Continued...

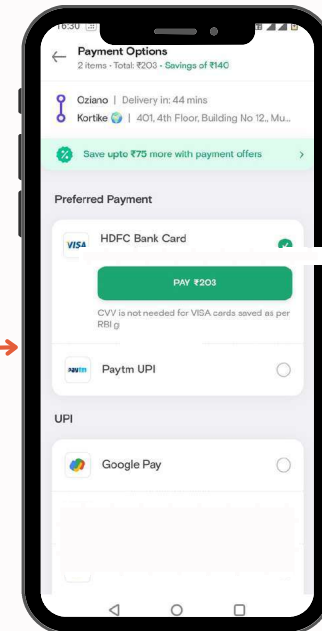

On the Cart page, you can check the **delivery address**, the **items** & any **coupon**.

The coupon page will give you ample options for the coupons. Select any one of them & click on **Apply**.

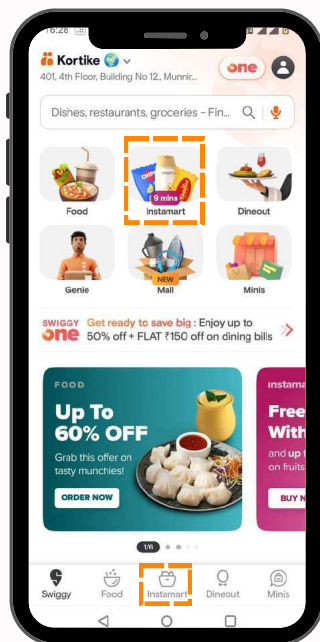

Then you can choose the tip for the partner & any delivery instructions & click on **Proceed to Pay**.

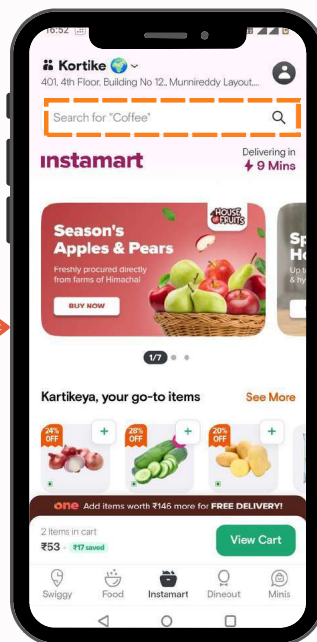

Complete the payment with the respective payment mode & track the order.

Customer Journey - Order Groceries

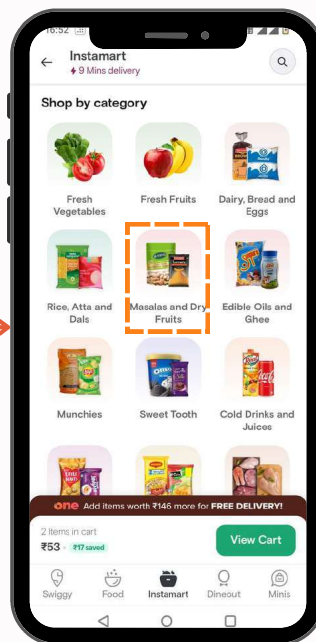

To order groceries from Swiggy Instamart, the customer has to follow the below user journey:

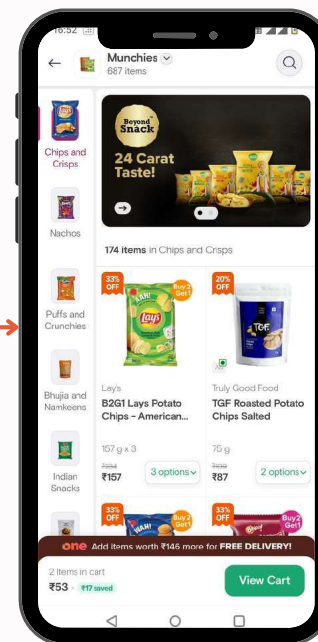

Open the Swiggy app. Click on 'Instamart' at the top/bottom.

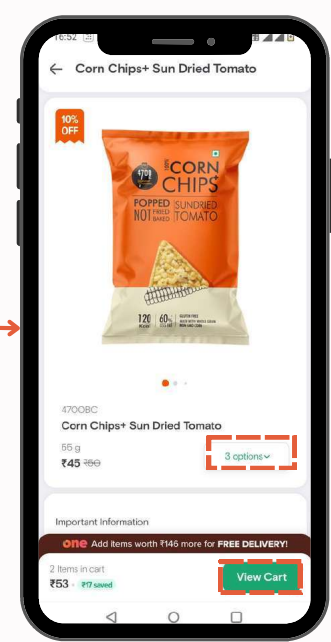

Instamart window, here you can search & order or quickly add to cart directly.

Or, you can visit a **category** & browse through the items.

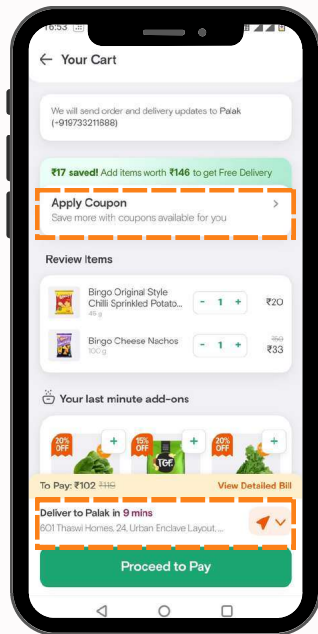

The category window would have sub-categories & items listed from where you can **Add**.

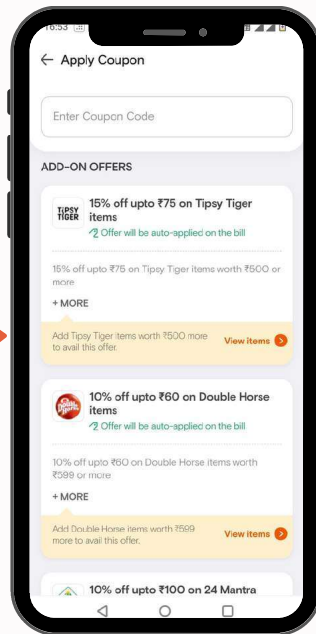

Or, you can also visit the product page & add the items to cart & then **View Cart**.

Customer Journey - Order Groceries

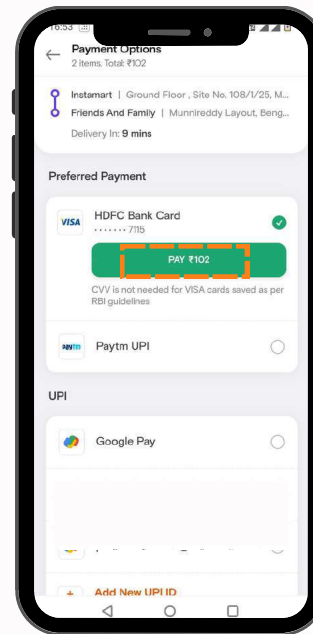

Continued...

On the Cart page, you can check the **delivery address**, the **items** & any **coupon**, while also adding any last minute items

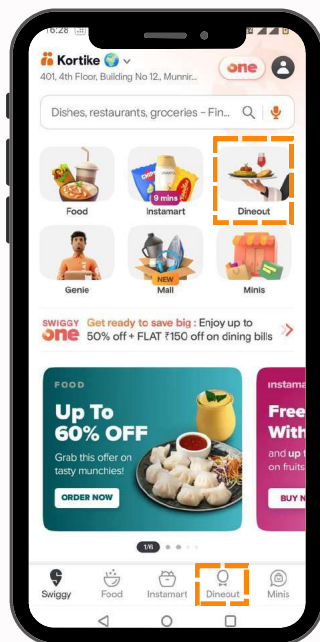

The coupon page will give you ample options for the coupons & add-ons. Select any one of them & click on **Apply**.

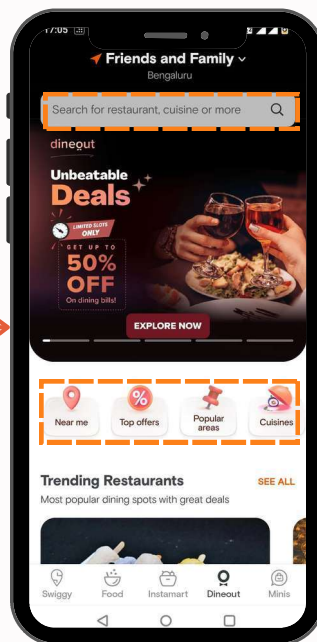

Once you have checked everything, click on **Pay** & track the order.

Customer Journey - Dineout

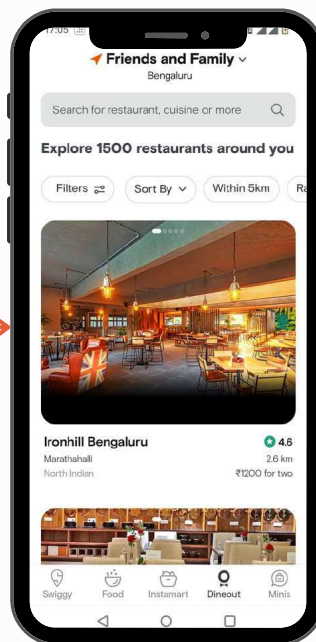

To discover restaurants on Dineout & pay bills via Dineout, the user has to go through this journey:

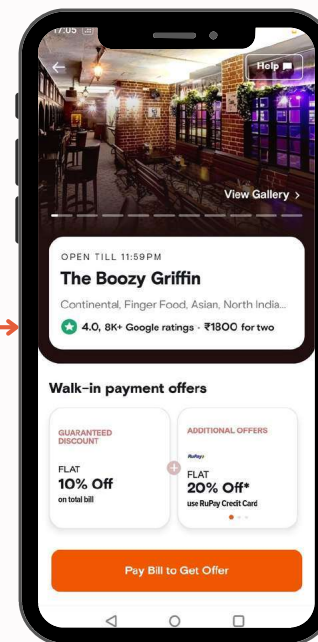

Open the Swiggy app. Click on 'Dineout' at the top/bottom.

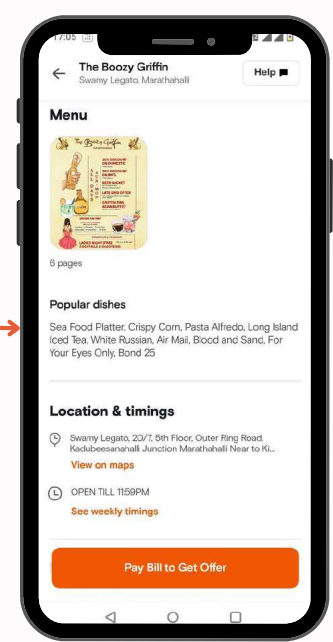

Dineout window, here you can search the restaurant, or choose & select out of any category

Or, you can browse through the list & select the restaurant.

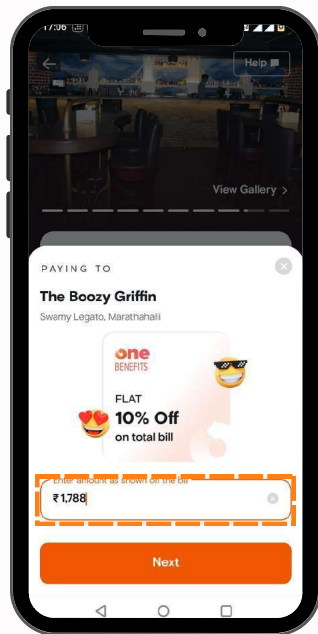

Restaurant page, where you can find the details, walk-in payment offers.

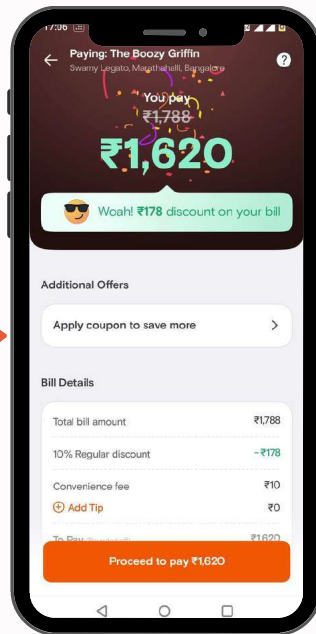

As also the location & timings, menus & popular dishes of the restaurant. Click on **Pay Bill to Get Offer**.

Customer Journey - Dineout

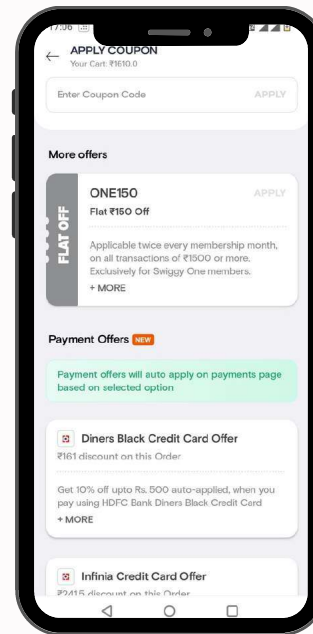

Continued...

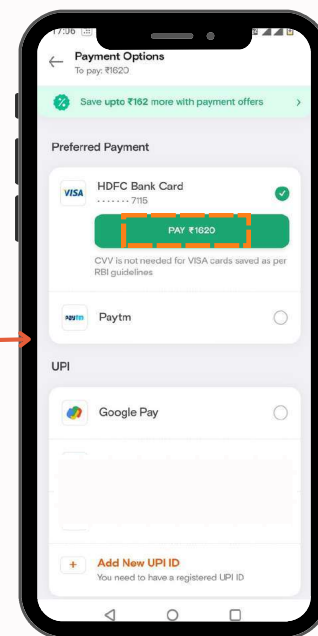

Enter the bill amount to be paid & click on **Next**.

The walk-in offer will be automatically applied, & you can also search for more coupons.

Dineout offers you a range of coupons both a bulk discount, card offers as well as cashback offers.

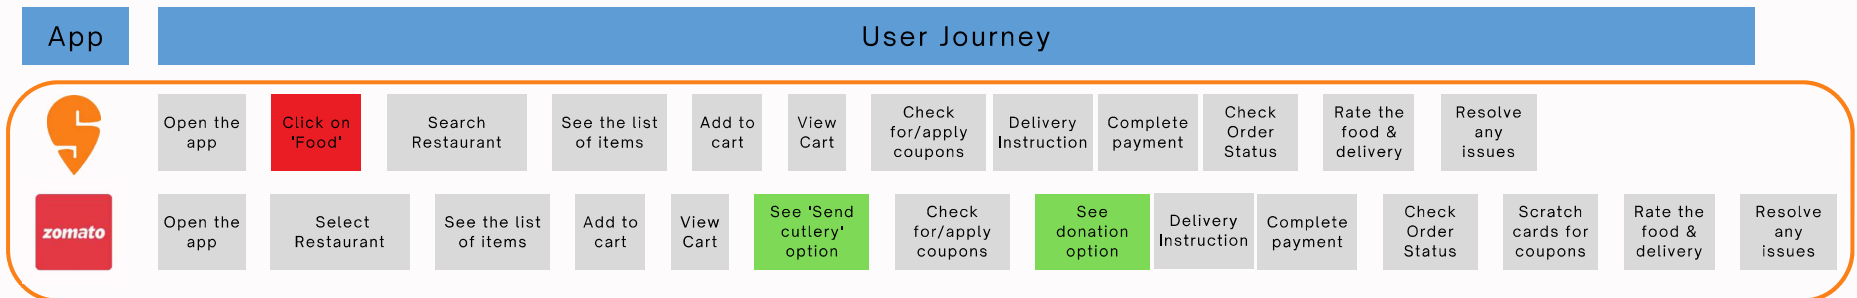

Complete the payment, sit back & relax!

Customer Journey Comparison - Food

We are comparing the user journey across different user intents of Swiggy & other similar apps to find out some of the pain points which users of Swiggy face.

For food delivery, we are comparing **Swiggy** with **Zomato** - to find out where Swiggy can improve.

Insights:

- Zomato has 2 more steps in their food ordering journey than Swiggy, yet consumers are happy with the ordering process.
- While Swiggy has less steps, yet two major features are present in Zomato which increase the likeability of ordering via Zomato.
- These are:
 - See '**Send Cutlery**' option - Zomato provides users with an option to check/uncheck sending the cutlery as part of their sustainability initiatives.
 - See **Donation Option**: Zomato also has a partnership with Feeding India & brings donation for them.
- Taking a cue from this, Swiggy can also add similar features to aid retention & engagement.

Customer Journey Comparison - Groceries

We are comparing the user journey across different user intents of Swiggy & other similar apps to find out some of the pain points which users of Swiggy face.

For **groceries**, we are comparing Swiggy with **Zepto, BB Now & Blinkit**.

App	User Journey													
	Open the app	Click on 'Instamart'	Search items directly & add	Explore categories & sub-categories	Add to cart	View Cart	Check for/apply coupons	Check the delivery address	Complete payment	Check Order Status	Rate the order & delivery	Resolve any issues		
	Open the app	Search for item	Explore categories	Add to cart	View Cart	Avail offers/coupons	Check out delivery tip if any	Give delivery instructions if any	Check the delivery address	Continue to payment	Make Payment	Check Order Status	Resolve any issues	
 bigbasket	Open the app	Click on 'BB Now'	Search items directly & add	Shop By Category & sub-category	Add to cart	View Cart	Check the delivery address	Checkout	Check for/apply coupons	Complete payment	Check Order Status	Rate the order & delivery	Resolve any issues	
 blinkit	Open the app	Search items directly & add	Shop By Category & sub-category	Add to cart	View Cart	Check the delivery address	Check for/apply coupons	See donation option	Delivery Instruction	Partner Tip	Complete payment	Check Order Status	Rate the order & delivery	Resolve any issues

Insights:

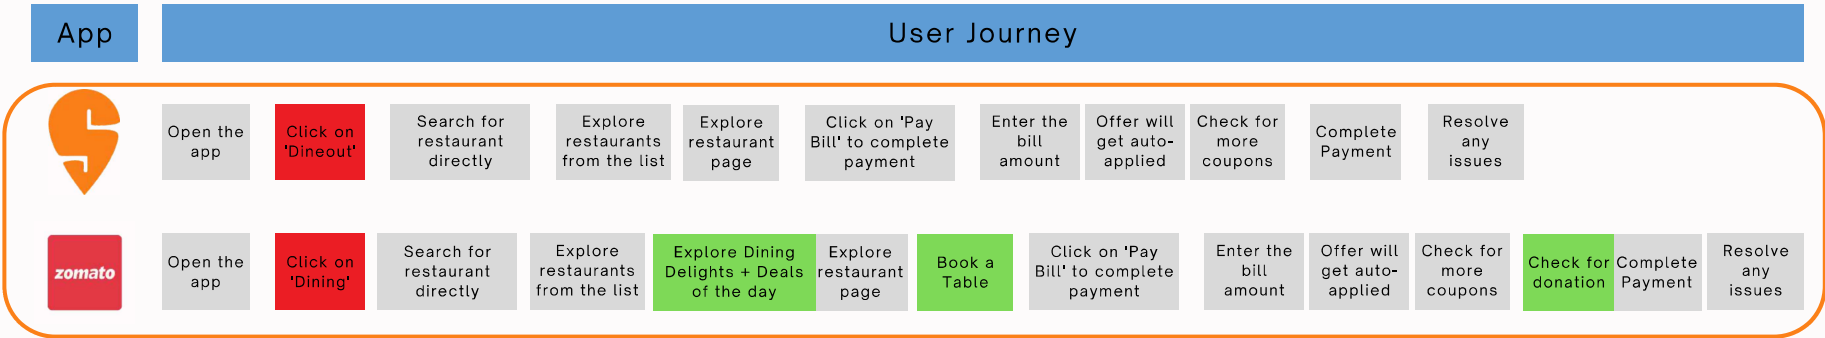

- Swiggy has an extra screen of the Swiggy Home Page, leading to increase in the purchasing time & can turn off users.
- They can also take into account the feature of providing the delivery instructions to the partners for easy delivery.

Customer Journey Comparison - Dineout

We are comparing the user journey across different user intents of Swiggy & other similar apps to find out some of the pain points which users of Swiggy face.

For dining out services, we are comparing Swiggy Dineout with **Zomato Dining**.

Insights:

- Zomato has three extra features of:
 - Dining Delights + Deals of the day
 - Book a table
 - Check for donations
- Swiggy can take a cue from these & implement any of these three features to increase retention & reduce churn.

User Personas

We have considered major three products of Swiggy

Aditya Srivastava

Age: 28
Occupation: Software
Location: Bangalore
Income Group: **High**

Status

Loves to explore new restaurants
A dormant user of Swiggy
Likely to switch to Zomato
Uses online payment wallets
Explored Swiggy's dine-out only once

PAIN POINTS

Restaurant denied receiving payment from "Dineout"

Unable to split bill amongst his friends circle

High waiting time on weekends and festivals

NEEDS

A feature which will show if a particular restaurant accepts payments through Dineout.

A solution that will indicate the "average waiting time" of selected restaurant at any given time

Functionality which will provide the user to split the amount per head and provide payment link to share

Megha George

Age: 34
Occupation: Teacher
Location: Delhi
Income Group: **Middle**

Status

Teacher
Takes care of family
Used Instamart once for ordering groceries.
Shifted to Zepto due to exciting offers
Often forgets to repurchase important items and buy in hurry

PAIN POINTS

Often orders for her friends but doesn't have the functionality to split

Keeps forgetting about the important items in the grocery list and out stock items

Finds Instamart quite expensive because of delivery charges

NEEDS

A solution to split bill amongst her circle who also ordered some items

A timely reminder of essential items to be ordered again if they are out of stock

Requires offers, discounts, additional coupons and less delivery charges to stay engaged

User Personas

We have considered major three products of Swiggy

Lakshay Verma

Age: 20
Occupation: Student
Location: Mumbai
Income Group: **Low**

Status

Loves to use discounts and offers
Orders food but at low cost
Might switch to Zomato
Uses online payment wallets
Explored Swiggy's Food only once

PAIN POINTS

Gets confused with too many choices and seeing good ratings with no review

Doesn't find the app attractive as the images of items are too small and not as appealing

Often finds the delivery charges higher than other platform

NEEDS

Ability to see real customer reviews rather than just ratings

Encouraging restaurants to add more innovative videos and photos to keep users engaged

Requires product tour to understand basic flow and finds difficult to figure out where to contact customer care or lodge any complaint

Going ahead, all our pain points & subsequent features would focus primarily on:

- Swiggy Food
- Swiggy Instamart
- Swiggy Dineout

User Pain Points

According to the users, the two most common pain points in the usage of Swiggy are:

UI/UX Issues & Data Utilization

UI of Swiggy is way below that of Zomato. Modern day users have also complained that the data which Swiggy is collecting should be utilised in a better manner.

High Delivery charge w/o subscription

Customers are unhappy with high delivery charge on both food & Instamart as opposed to competition, making it easier for them to drop off & move to other apps.

Increase in Cognitive Load

There are too many options to choose from in the item/restaurant listings, thereby highly increasing the cognitive load of the users in selecting the items.

Lesser deals as compared to Zomato

Customer complaints denote that Swiggy offers less deals, offers & payment related discounts than Zomato. Their subscription plan is way too highly priced with no options of lesser packs.

Features

To cater to these pain points, the following features need to be added in Swiggy to increase transacting users:

Swiggy Family

Specially designed as an Instamart & Dineout offering, this gives users many different options like bill splitting, group ordering etc to engage the customers & provide them accessibility.

Revamp of Swiggy ONE

A new version of the highly successful Swiggy ONE subscription plan, to be launched in two phases both for new & existing users.

Try What To Explore?

An AI-based model that aims to reduce the cognitive load of the users by giving out appropriate suggestions of restaurants in Swiggy Dineout.

Campaigns for New Users

Brand & marketing campaigns to attract new users to the app.

UI/UX changes

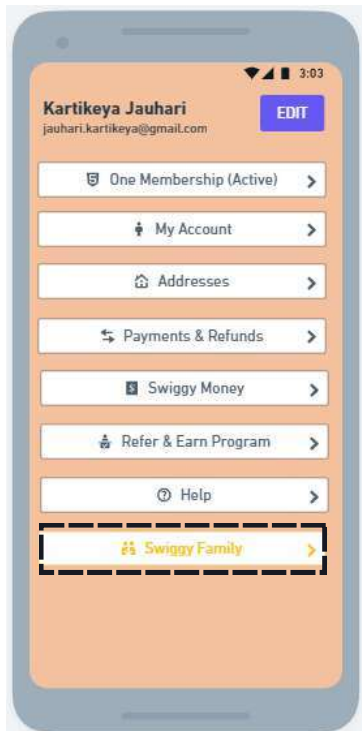

Providing a very smooth UX to the user by improving on the interface & visuals of the app.

Swiggy Dineout Community

A community of like minded individuals, on Dineout.

Swiggy Family

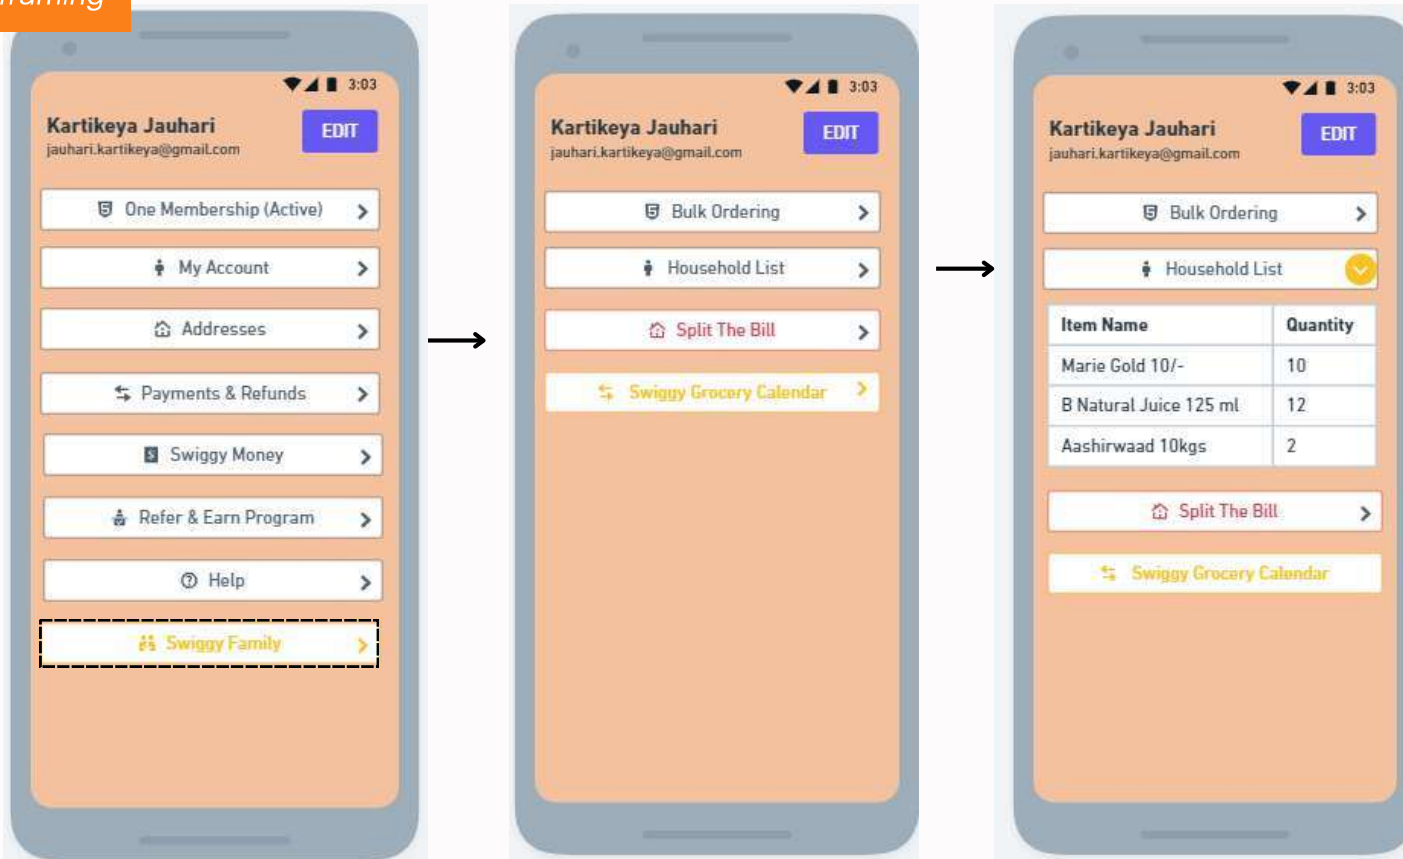

Feature Description

- Swiggy Family is specifically designed for Instamart & Dineout.
 - Swiggy Family is a way which provides users benefits of:
 - **Bulk ordering** in groups from Instamart.
 - Providing users the option to have **items list**.
 - **Grocery Calender**
 - **Order reminders**
 - **Split The Bill Feature**
 - **Household List:**
 - When a user transacts on Instamart for the first time, this feature will give them an option to create a list of the ideal items bought in a month.
 - This list can be used by returning customers to transact every time.
 - **Grocery Calender:**
 - This can be integrated with Instamart.
 - Regular purchases would automatically be added to this & shown to users whenever they come to Instamart.
 - **Order Reminders:**
 - Once the items are auto added in the grocery calendar, based on the item shelf life & past buying behaviour, timely reminders can be sent to people to purchase the same items.
 - Based on this, these same items would be auto-shown in the checkout page under the '**Time to Buy these**' header to aid the buying.
 - This would also act as a nudge for users to buy if they had forgotten.
 - If the users have already added those items to cart, then it wont be shown in the 'Time to buy these' header.
 - **Split The Bill:**
 - This feature would aid the households which buy for >6 people, as it would aid in clearing finances.
 - **Bulk Ordering:**
 - Users can add groups in one account.
 - This would enable bulk ordering from the groups.

Swiggy Family

Wireframing

Metrics
Affected

- Customer Engagement
- Customer Retention
- Increased Order Value
- Revenue
- App usage

Revamp of Swiggy ONE

Feature Description

- Swiggy ONE is the customer subscription plan available to be bought for the users.
- Currently, it is priced at:
 - 299/- for 3 month
 - 1499/- per year.
- They also offer promotional offers time-to-time like 19/- for 1 month & free with HDFC Swiggy Credit Card.
- Under the revamp, we will be doing two things:
 - **Phase 1:**
 - Bring in lesser-price packs -
 - 89/- for 1 month
 - 149/- for 2 months
 - 279/- for 2 months.
 - Zomato achieved success on launching Pro packs at 199/- for 3 months. **Similarly, Swiggy can also move into this direction with their ONE packs.**

• Phase 2:

- Introducing **Swiggy ONE Lite**.
- This is a starter no-cost starter subscription pack for a limited set of new users.
- To attract new users to utilize the benefits of Swiggy, this subscription pack will:
 - Only be applicable to users who have logged in for the first time.
 - This will be auto-applied to their account post-login.
 - Valid till first 5 orders only.
- Benefits:
 - **Free delivery** on all 5 orders
 - Brand coupons after every order
 - Scratch cards after every order.

Benefits

- Increased purchase of ONE plans will lead to an increase in the user base.
- Increased orders due to LITE free delivery

Metrics Affected

- Customer Acquisition
- Customer Loyalty
- Increase in AOV
- Number of Orders
- Revenue

Try What To Explore?

Feature Description

- This feature would aim at segregating the listings for the user & providing a unique listing, to make the transacting process easier.
- **Try What To Explore?** would be an AI-based model to give suggestions & reduce the **cognitive load** of the users in choosing what to order.
- This would be an **exclusive** feature in Dineout only, in **Metro & Tier-1 cities** initially, with expansion later on.
- **Try What To Explore?** will prove beneficial for users to get the appropriate place to visit via Dineout.
- **For new users**, they will have to give preferences to Dineout while using it for the first time.
- **For existing users**, Swiggy Dineout would have already created a list of restaurants to choose from, based on your past history

- Initially, the AI-based model would probably use one or all of these clustering variables to design:
 - **Quality Seekers:** Users who opt for quality over price & affordability.
 - **Convenience Seekers:** Users who opt for convenience over affordability & quality.
 - **Value Seekers:** Users who opt for affordability & value over quality & convenience.
 - **Remaining smaller segments**

Benefits

- This would highly reduce the total cognitive load of the users.
- The AI model will provide accurate to very accurate suggestions leading to good reviews, ratings & visits to the restaurants.

Metrics Affected

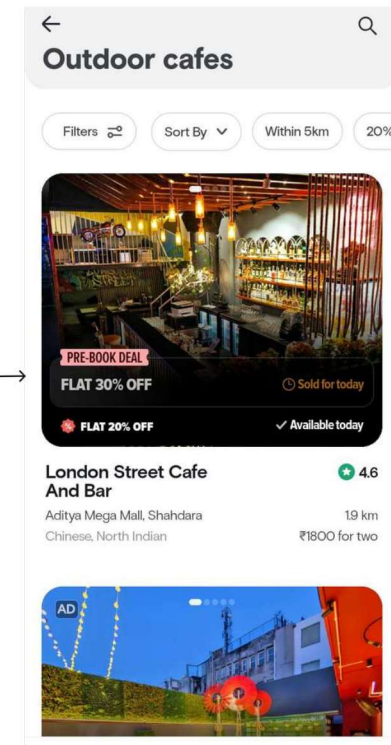

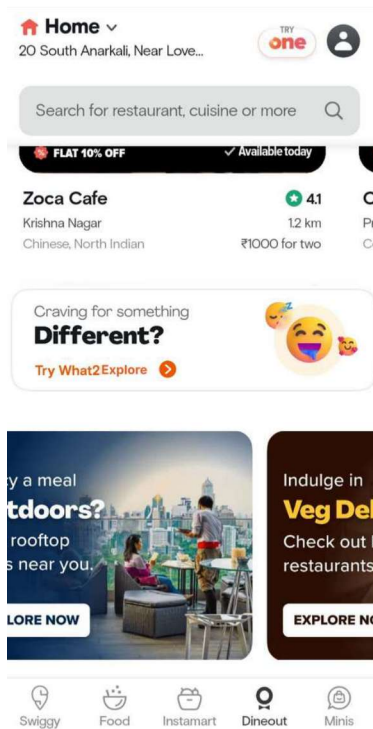

- App Engagement Rate
- Restaurant visits
- Increase in paying bills through Dineout.
- App usage
- CLV

Try What To Explore?

Integrating Swiggy's "What2eat" in Dine out as "What2Explore" where users can immediately get suggestions according to their respective locations

User will be selecting the cuisine or any specific ambience they are looking for

And will be getting multiple option within the selected category

New User Campaigns

Feature Description

- Today, to attract new users, we will bring in user campaigns providing them some benefits.
- Running campaigns always help in improving TOPA & thereby more & more users come to the platform.
- Swiggy will provide **brand coupons** on first order (as also covered in Swiggy ONE Lite).
- There would be **customized push notifications** based on time of app interaction & user location.
- Swiggy will run time-sensitive promotions like '**Happy Hours**' with discounted prices in specific hours.
- On **Instamart**, there can be a **midnight flash sale (12-1 AM)** where extremely low prices of specific items will be available to purchase.

Benefits

- Creating & launching campaigns for new users will yield results like:
 - Buying of ONE Lite plans as it will be auto-added.
 - Exposure to benefits of Swiggy.
 - Quick selling of stocks in Instamart.
 - Increased footfalls in the app

Metrics Affected

- Customer Loyalty
- Retention Rate
- Customer Lifetime Value (CLV)
- App footfalls
- WOM

UI/UX Changes

Feature Description

- One of the common user pain points was that the UI of Swiggy had many issues, leading to a disturbance in the overall UX.
- Hence, we are suggesting some changes in user interface, ultimately leading to better UX.
- Putting in a **quantitative number** next to a restaurant/item listing.
- Currently, Swiggy is only in **English**. To cater to many users coming from different geographies, it is essential for Swiggy to provide multiple languages in which the app can be used.
- This would also make Swiggy the first food tech player to provide multi-language support.
- While ordering on Swiggy, one can clearly realize that the images/icons on Swiggy are not attractive, as they are very small. Hence, **putting in large images/icons** on the restaurant/product listings would certainly help.

• UI Additions in Swiggy Dineout:

- Taking note of Zomato, it would be always useful if we give a real feel to the restaurant we are looking at. Hence adding a **Vibes/Stories** section in the restaurant page in Dineout would give the users a better idea & influence their decision making,

• Swiggy Connect:

- This would be an attempt to **connect Swiggy Food & Swiggy Instamart together**.
- **How this works?**
 - While ordering food, if a user clicks on a listed item to see its description, Swiggy will then show the cooking process & the ingredients that went in it.
 - Following it up with the option to users to buy the same ingredients from Instamart directly, redirecting them to Instamart page.

Metrics Affected

- Customer Retention
- Customer Lifestyle Value (CLV)
- Revenue Growth

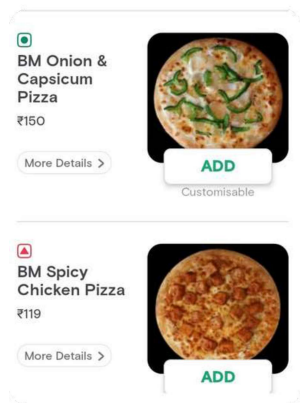

Benefits

- Users will have a 360-degree package - forcing them to increase revenue with **Swiggy Connect**.

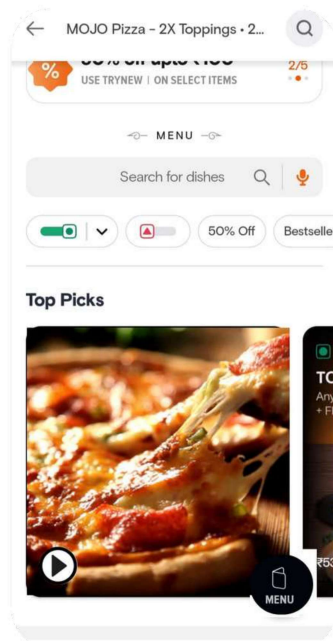

UI/UX Changes

This feature will be integrated in both
Delivery and Dine out

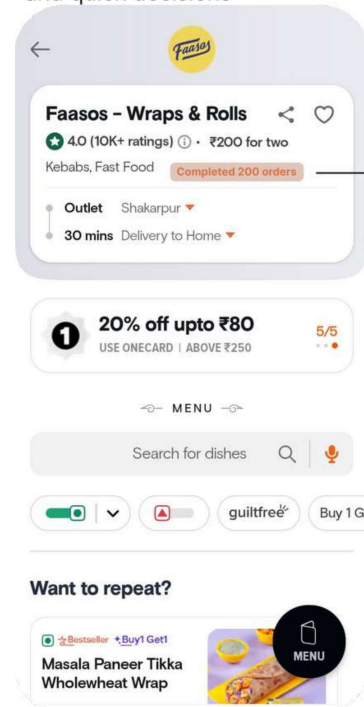

Adding bigger photos for better
clarity and increased engagement

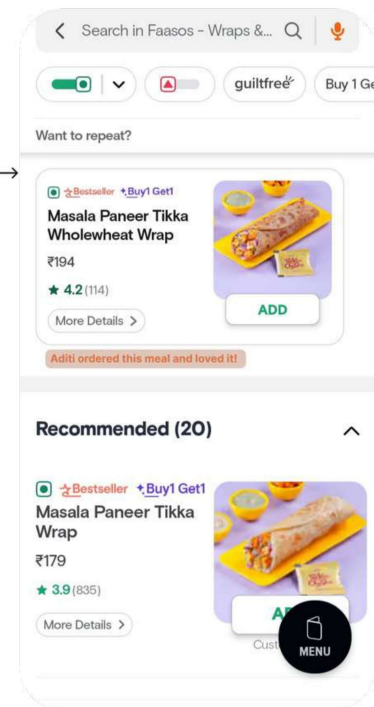

Advertising items in the "top picks" section
to accelerate interest within the potential
users and increase transparency and trust.

Adding number of completed
order from last week to build trust
and quick decisions

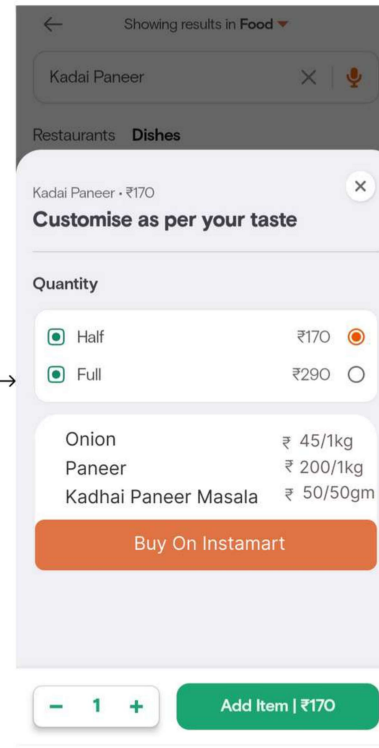

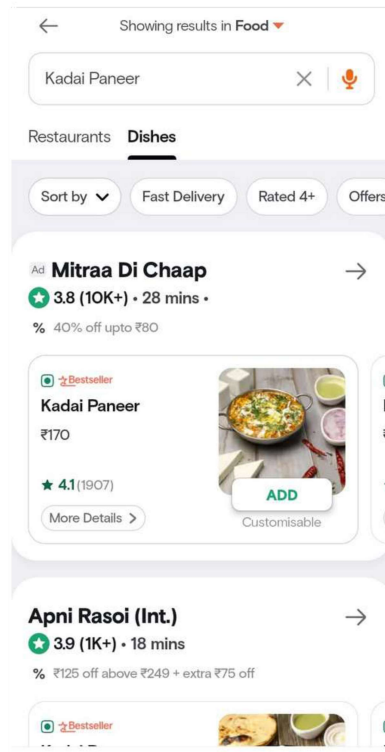

Accessing contact details to add name of
person in the user's contact details who tried
an individual menu item and liked the food

UI/UX Changes

While selecting item from the menu

Swiggy can integrate "Food" with "Instamart" where while adding the item in the cart and customizing a per taste, swiggy can suggest buying ingredients of the dish directly from Instamart

Swiggy Connect Feature

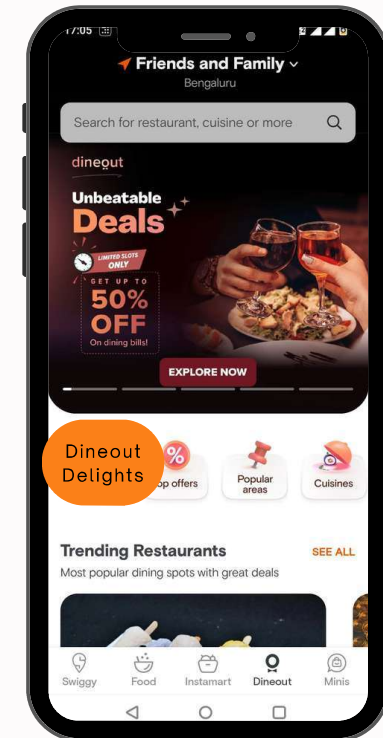

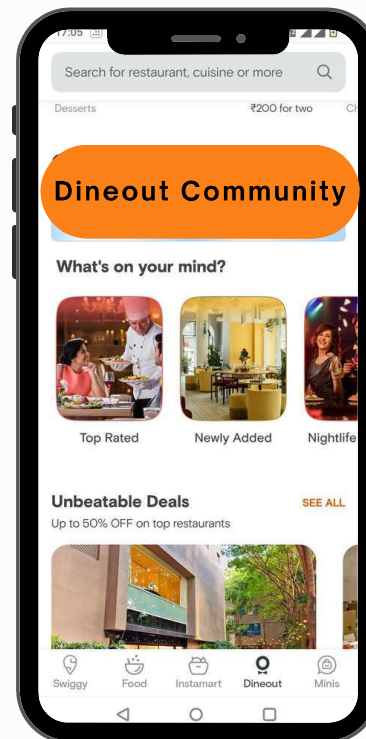

Swiggy Dineout Community

Feature Description

- This is a feature which would be beneficial for Dineout users. Under this:
 - There would be a **Swiggy Dineout Community** which would be a community of like-minded individuals having similar liking towards trying out new dishes & dining out frequently.
 - Once users have **transacted once** on Swiggy Dineout, they would be **eligible** to become a part of this community.
 - No extra cost will be taken by the users to join the community.
- **Swiggy Dineout Delights:**
 - Swiggy has its annual dining festival known as **GIRF (Great Indian Restaurant Festival)** which offers users the option to purchase restaurant deals.
 - **Delights** would be an extension of this & would be a year round event where users can buy deals.
- Dineout can also partner with restaurants & create an '**App Only**' menu which is only applicable when

Metrics Affected

- Customer Retention
- Customer Lifestyle Value (CLV)
- Revenue Growth

Feature Prioritization

The RICE score method has been used to prioritize the feature launch.

Feature	Reach (% of Users)	Impact (0-5)	Confidence (%)	Effort (months)	Score/Rank
Swiggy Family	75%	4	80%	3	0.8 (4)
Revamp of Swiggy ONE	70%	4	70%	2.5	0.78 (5)
UI/UX Changes	80%	4.5	90%	2	1.62 (1)
Swiggy Dineout Community	65%	3.5	75%	3	0.56 (6)
New User Campaigns	75%	4	85%	2	1.27 (2)
Try What To Explore?	80%	4	85%	3	0.90 (3)

Feature Rollout Plan

A quick look at how the prioritized feature will be rolled out.

According to the RICE matrix, having **UI/UX changes** has to be the first feature to be rolled out

Step 1: Customer Research & Feature Development

- Research UI/UX features available in the market - **Zomato, Blinkit, Zepto etc.**
- Through the user journey, identify what needs to be added initially.
- Aim to have maximum customer engagement & retention.
- Develop the UI changes within 2 months from start.

Step 2: UAT & Pilot

- Identify pilot markets based on TG audience.
- **3 metros** - Delhi, Mumbai & Bangalore.
- **3 Tier 1 cities:** Pune, Kolkata, Ahmedabad.
- Launch the UI features in the pilot markets.

Step 3: Sales & Marketing

- Re-launch the app with new UI developments.
- Use nudges - push notifications, web & email marketing.
- Spread the word of '**Swiggy in a brand new avatar**'.

Step 4: Analysis of Pilot, UAT & Metrics

- Analyze **Pro sales over initial period** of Pilot.
- **Overall spends vs sales** analysis to gather ROI data & future planning.
- Identify the **North Star Metric: Churn Rate & Retention Rate.**

Step 5: Full Rollout

- Full rollout to be done in 3 phases:
- **Phase 1:** Pilot
- **Phase 2:** All metros (post pilot feedback & post 4 months of pilot)
- **Phase 3:** All Tier 1 cities (after a year of Phase 1).
